

MicroImages Press Release

View Terabyte Images Almost Instantly

The TNT products from MicroImages now display terabyte-sized images from your hard drive in a fraction of a second or in several seconds when compressed and copied onto a DVD. The tiles, DOQs, or other files making up the single, large, virtual image can be in JPEG2000, MrSID, or ECW format and, thus, remain directly usable in other products. For details see the illustrated Technical Guides at www.microimages.com/press/multifile.htm. Prove it using a DVD with a 1-meter resolution color image of Nebraska rendered at any scale in seconds. Request this sample DVD including a free viewer for Mac and Windows from info@microimages.com.

MicroImages' trademarked line of products includes TNTmips[®], the Map and Image Processing System; TNTedit[™], for visualization and editing; TNTview[®], for visualization and interpretation; TNTatlas[®], for wide scale publication of electronic atlases; and TNTsdk[®], for development of custom modules for TNTmips. TNTserver[™] and TNTmap[™] work together to provide access to atlases over an intranet or the Internet. TNTlite[®] is a free, full-featured version of TNTmips limited only by the size of project materials and the restriction of project materials created to use in the TNT products.
